Bell Tower

A modern LDAP monitoring
solution

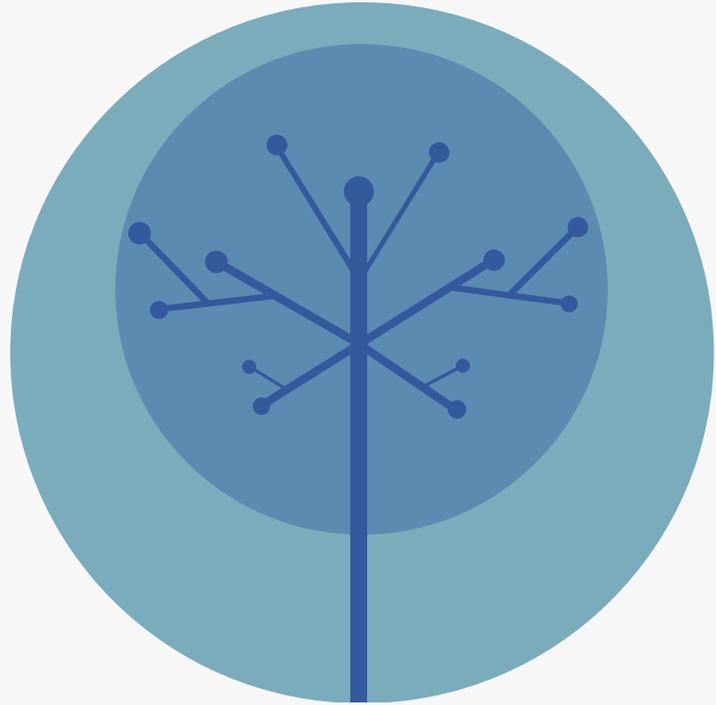

БЛАГОДАРЯ

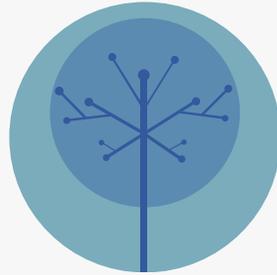

In [systems engineering](#) and [requirements engineering](#), a **non-functional requirement** (NFR) is a requirement that specifies criteria that can be used to judge the **operation** of a system, rather than specific behaviors.

Rex Consulting

Rex Consulting

Bell Tower

A modern LDAP monitoring
solution

Bell Tower is an **all in one LDAP** monitoring solution.

Current
monitoring
solutions are
lacking

Today's
LDAP
monitoring
solutions

Why current LDAP monitoring is lacking

Missing important LDAP metrics to monitor

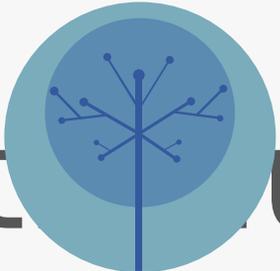

Unintuitive user experience

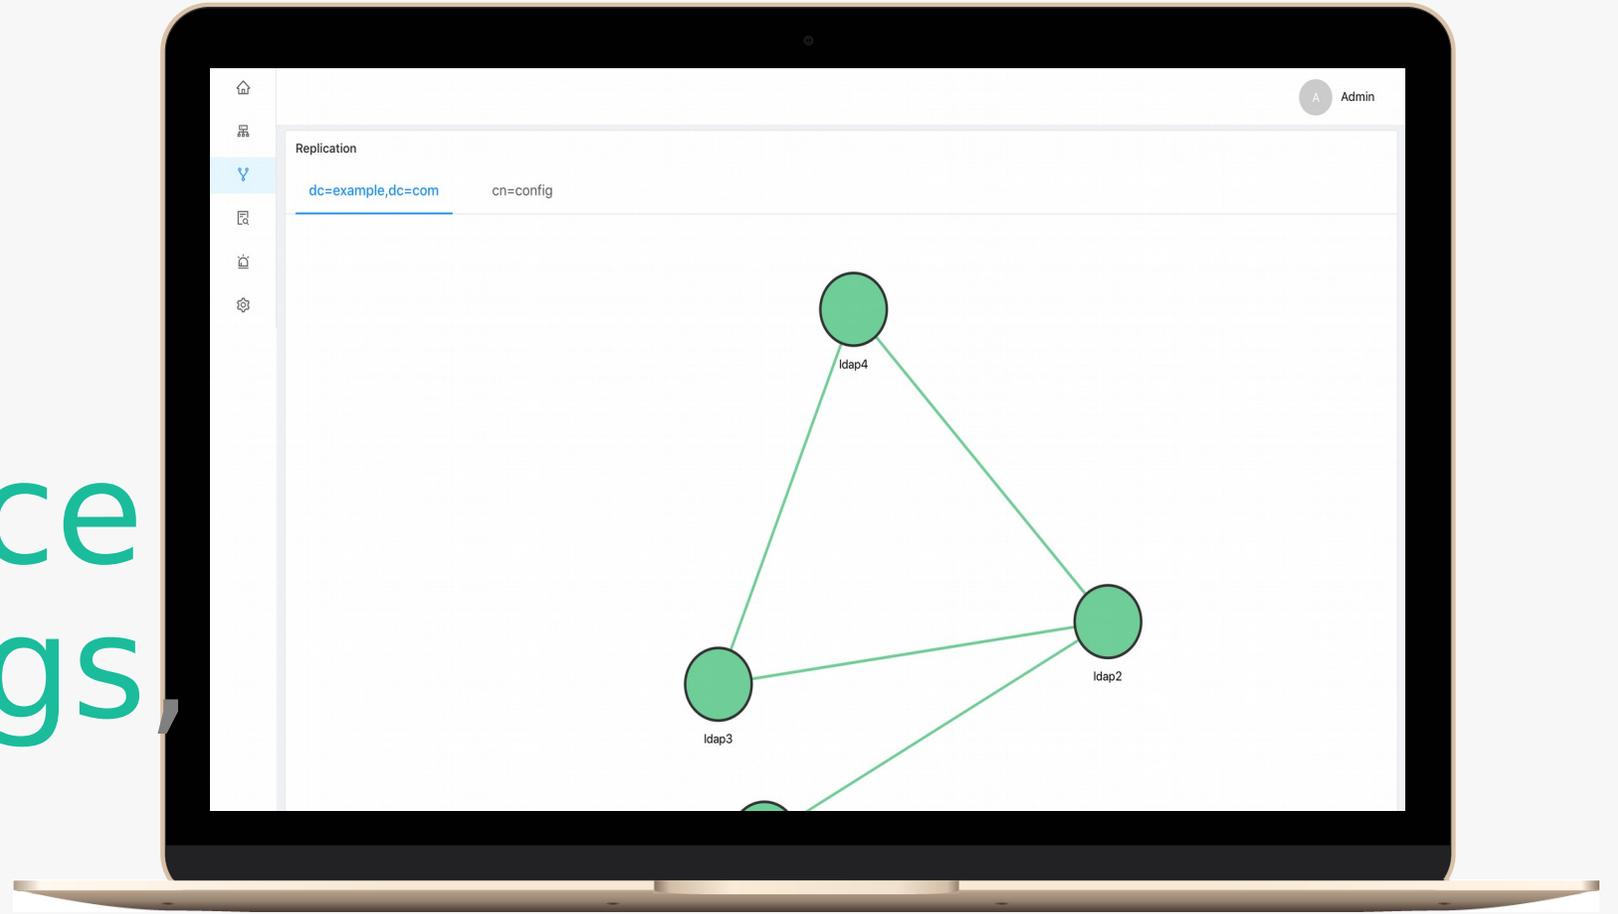

Uses ancient tech stack

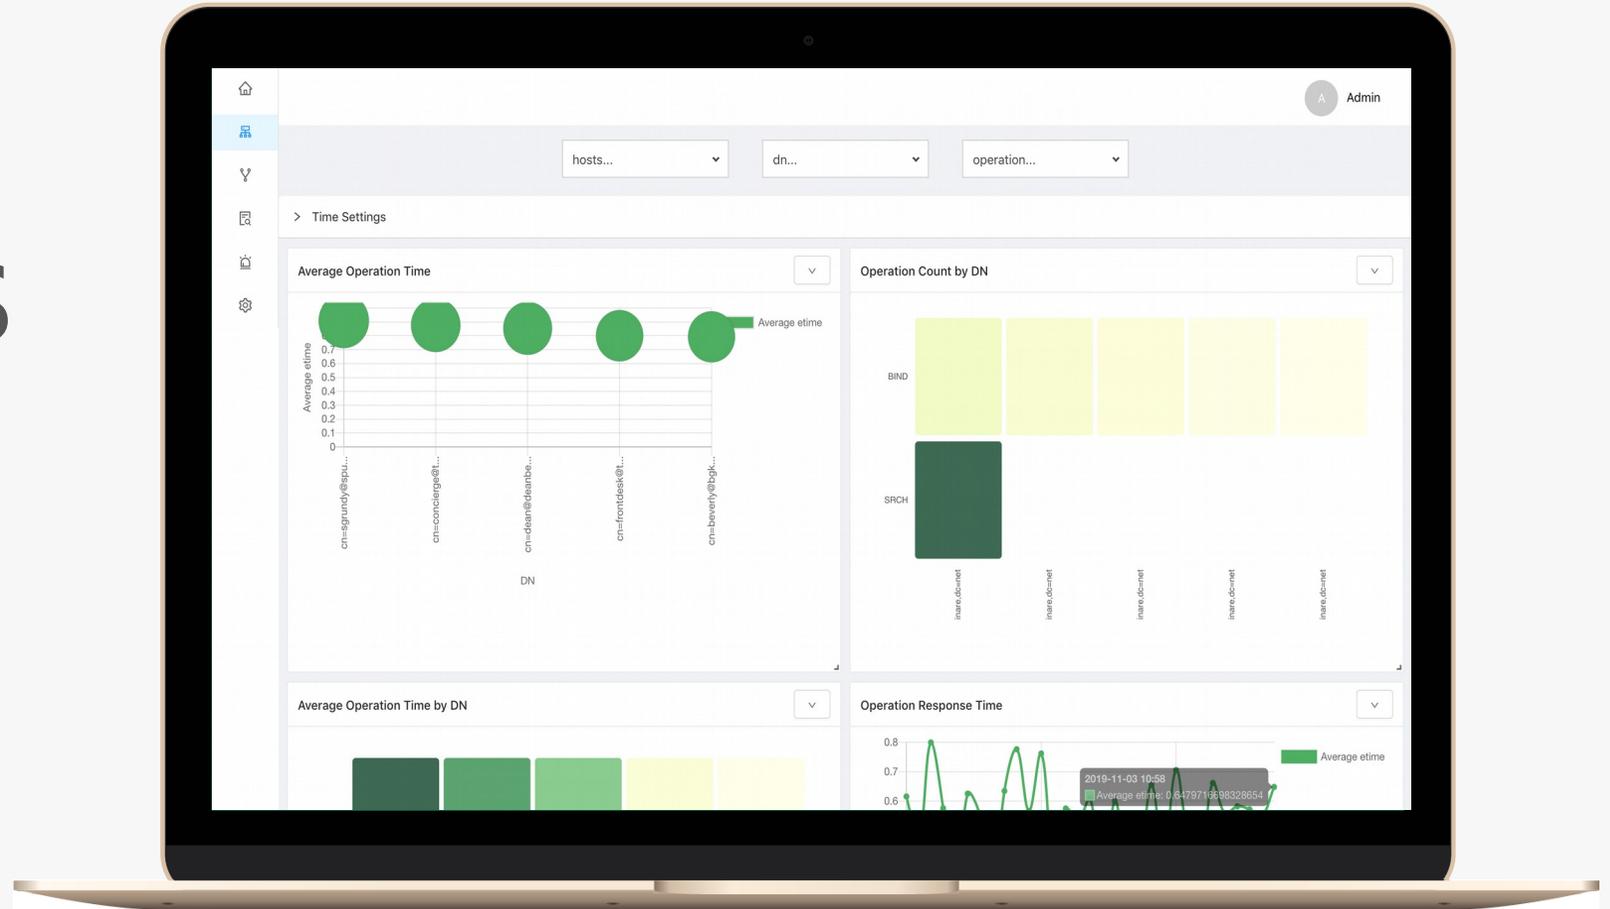

Introducing
Bell
Tower

We provide monitoring for **system metrics, performance metrics, logs and replication**

Our UI is
easy to
use

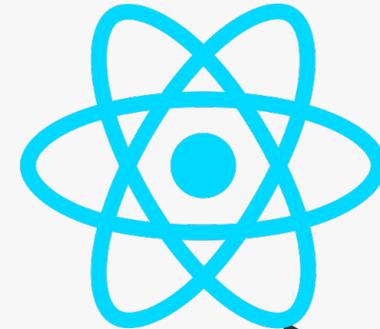

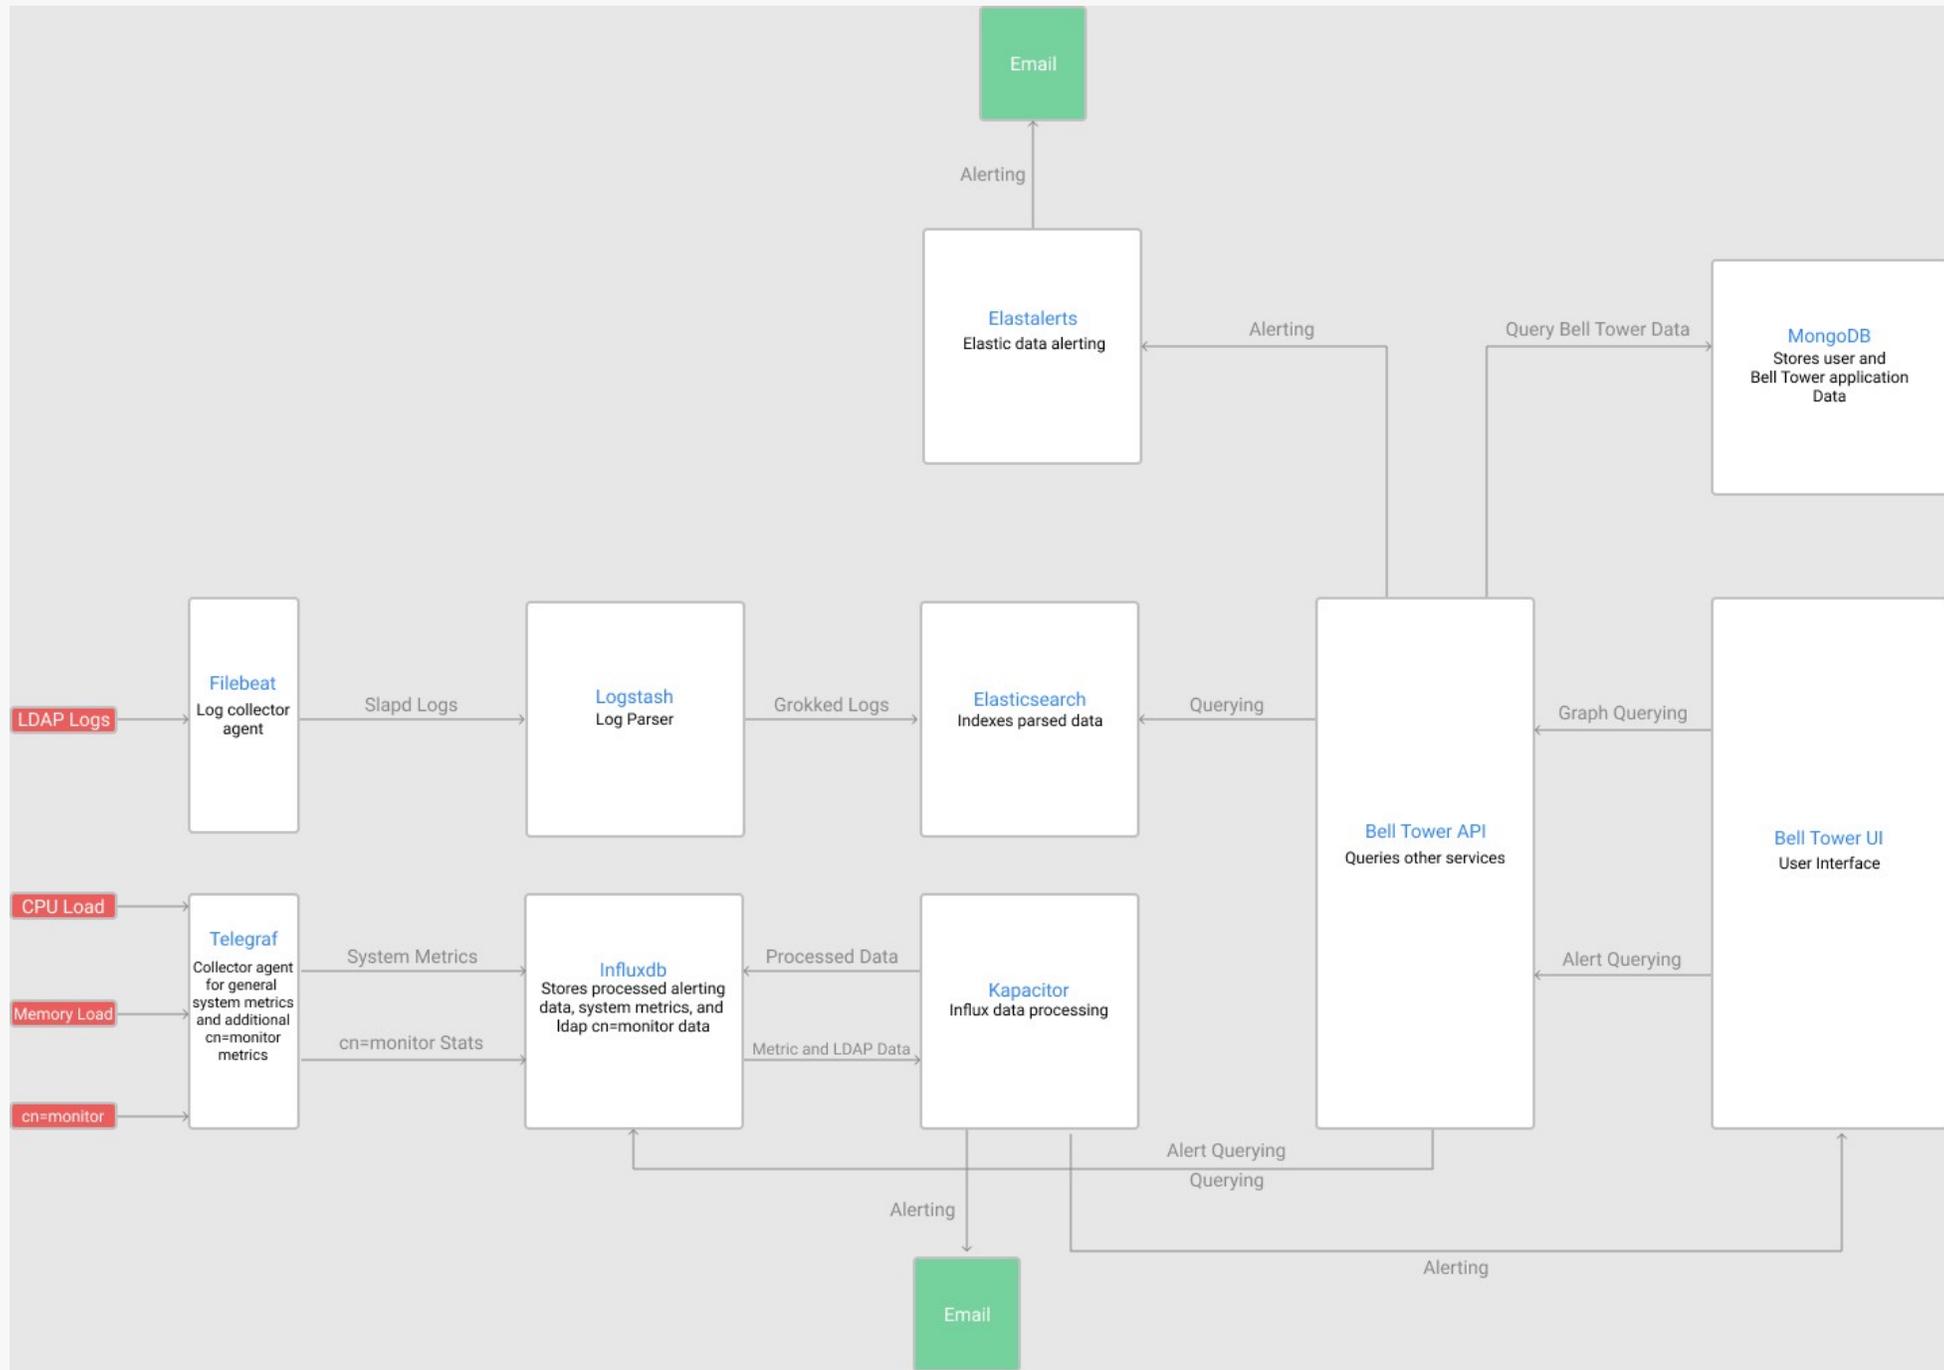

We use
proven
open
source
solutions
to power
our
software

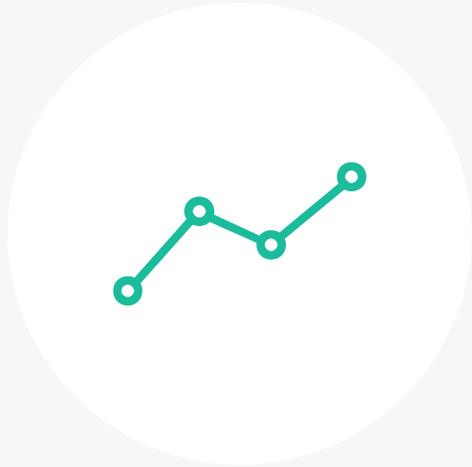

influxdata[®]

Bell Tower
is built
using
modern
web
frameworks

Some of our features

Modern graphs
powered by
D3 and
ChartJS

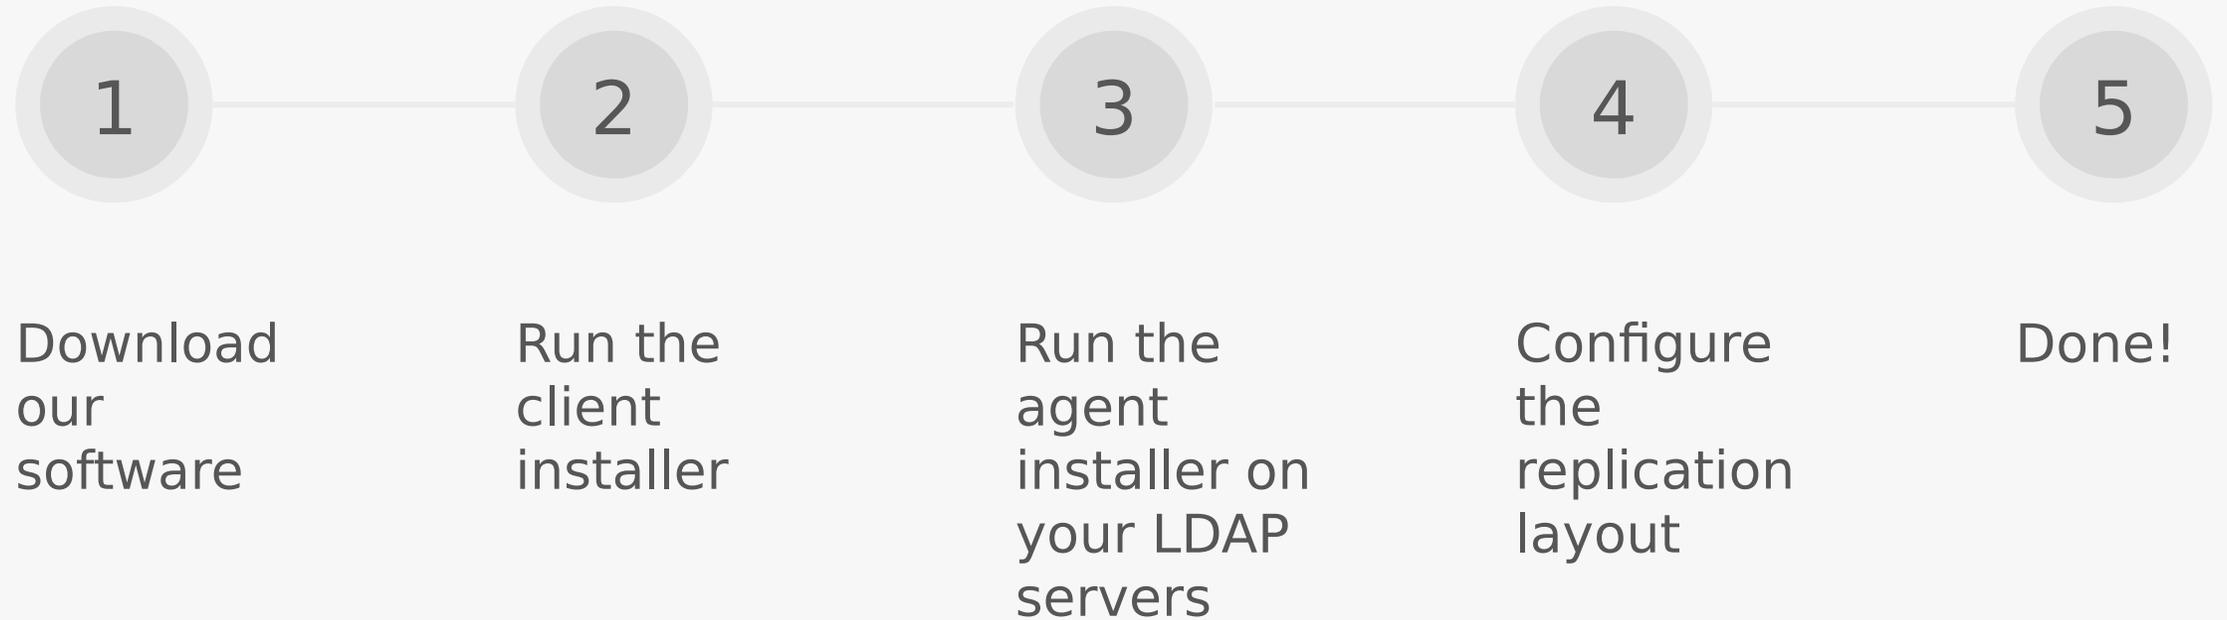

See replication
changes as
they happen

Get LDAP
query
performance
data

Setup is *easy*

We bring **visibility** to your LDAP infrastructure.

Get Alerted

on
Replication
Issues

Know when there are delays or nodes are down

Improve LDAP
Performance

Pinpoint problem queries. See which users' queries are taking the longest

Centralized
Logging all in
One Place

Easily query logs with our indexed fields
