LDAPCon 2026

OCT 6-8, 2026 | Tübingen, Germany

Contact: 2026@ldapcon.org

ABOUT LDAPCon

The LDAPCon is a well-established, community-driven technology conference dedicated to the LDAP ecosystem. First held in 2007, it brings together practitioners, developers and experts from across the globe for three days of exchange, exploration and collaboration.

The event offers a unique forum to deepen understanding of directory services, share hard-won operational experience and discuss emerging features, implementations and use cases. Newcomers and long-time professionals meet in an open, informal and highly collegial atmosphere that has long been a hallmark of the LDAP community.

For sponsors, the LDAPCon provides an exceptional opportunity to present technologies and solutions directly to a focused and knowledgeable audience from industry, open source projects, academia and public institutions. Engaging with participants in this environment helps spark ideas and build lasting connections that move the ecosystem forward.

LDAPCon 2026 is organised by Symas and DAASI International. We would be delighted to welcome you as a sponsor of the event and as a supporter of an open and innovative community dialogue.
